E-SAFETY TIP	Tip #1: Do not download or install anything on your computer without your parents' permission.	Tip #2: Remember that just because lots of people are sharing the same opinions or beliefs online it does not make those opinions or beliefs true.	Tip #3: Know that when communicating online some people use a different 'language' than when they are speaking face to face.	Tip #4: Consent is another word for permission. We need to ask for permission for some things and give permission for others, when we're online as well as offline.	Tip #5: Sometimes organisations will ask permission before they do something that might affect you or your account. Would you share your location? 	Tip #6: Understand that media can shape ideas about gender, race, religion, disability, culture and other groups. Why is it important to challenge and reject inappropriate representations online?
